

OSM Editing I Demo

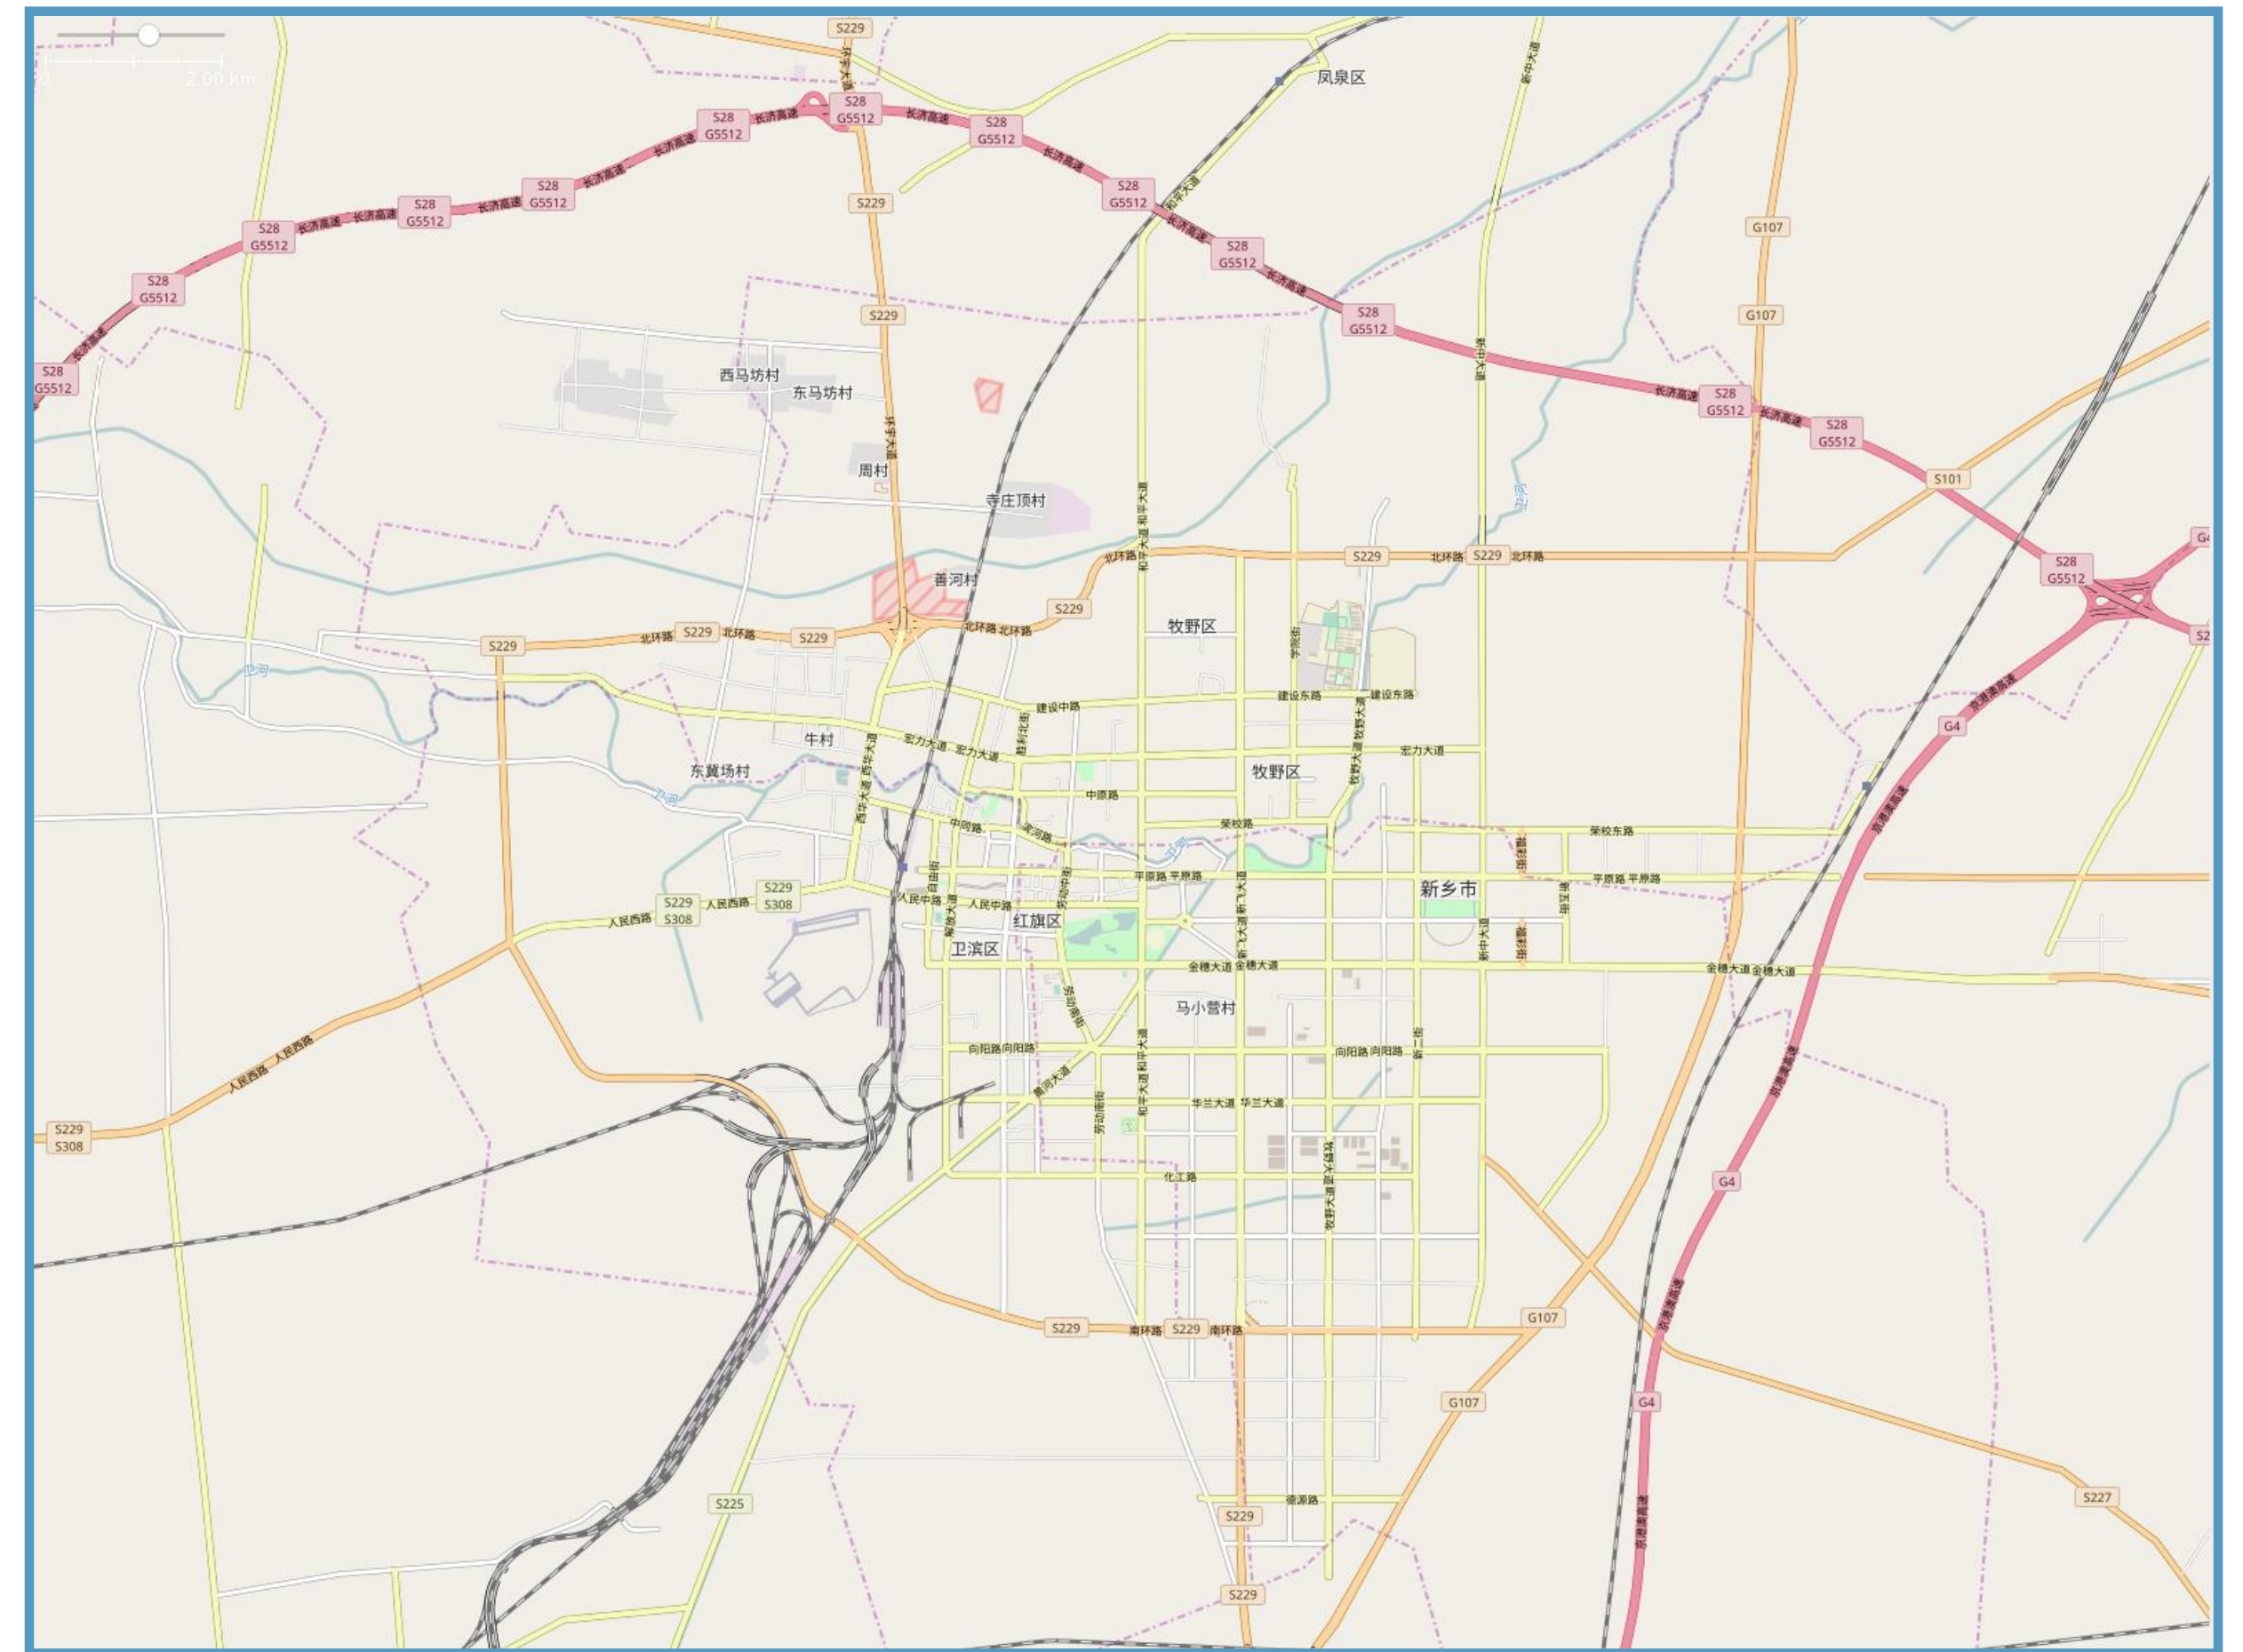

High Classification Routes

March, 2018

Editing Demo

Tasking

- Task:
 - Clean up HPR in a city in China
- Preparation already conducted:
 - Reviewed OSM Wiki page for China
 - Located Imagery layers & added GPS tracks layer
- Located the city & downloaded high classification routes via query

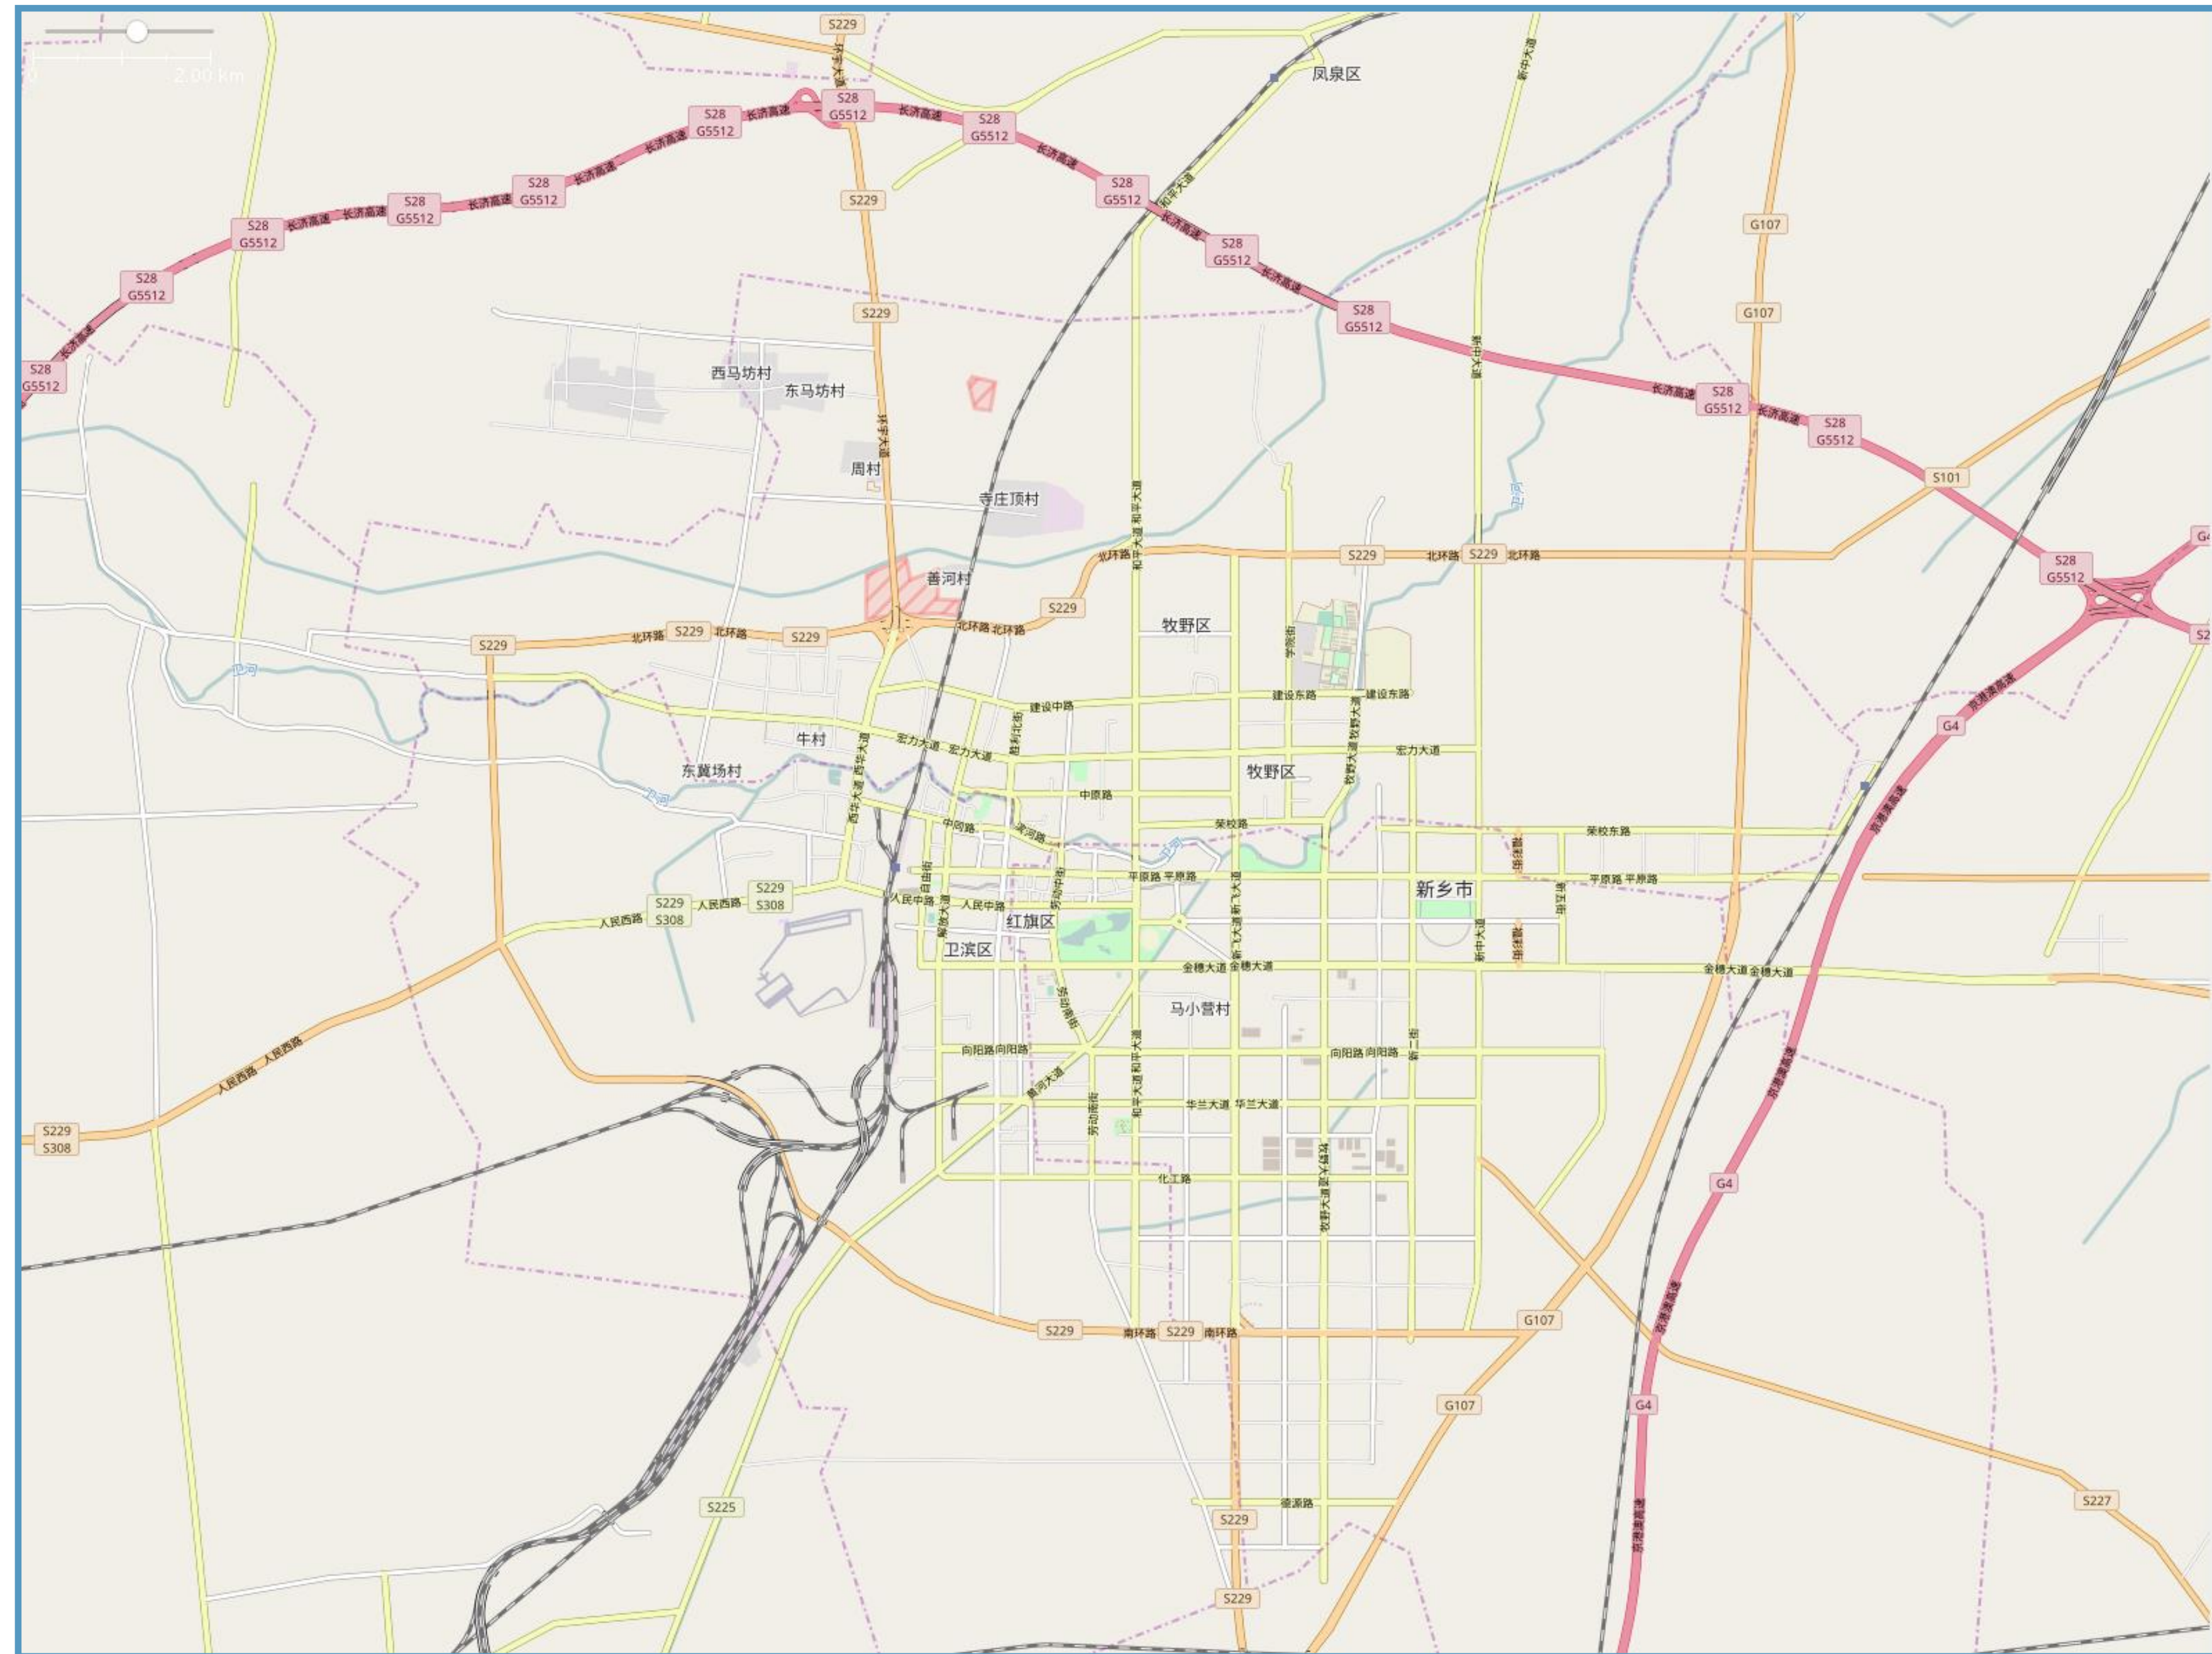

Xinxiang, China

<https://www.openstreetmap.org/#map=13/35.30890271073152/113.87996658002228>

Editing Demo

OSM Standard

- Quick & Easy paint style
- Let's review classifications at a glance without downloading data

Editing Demo

Initial Data

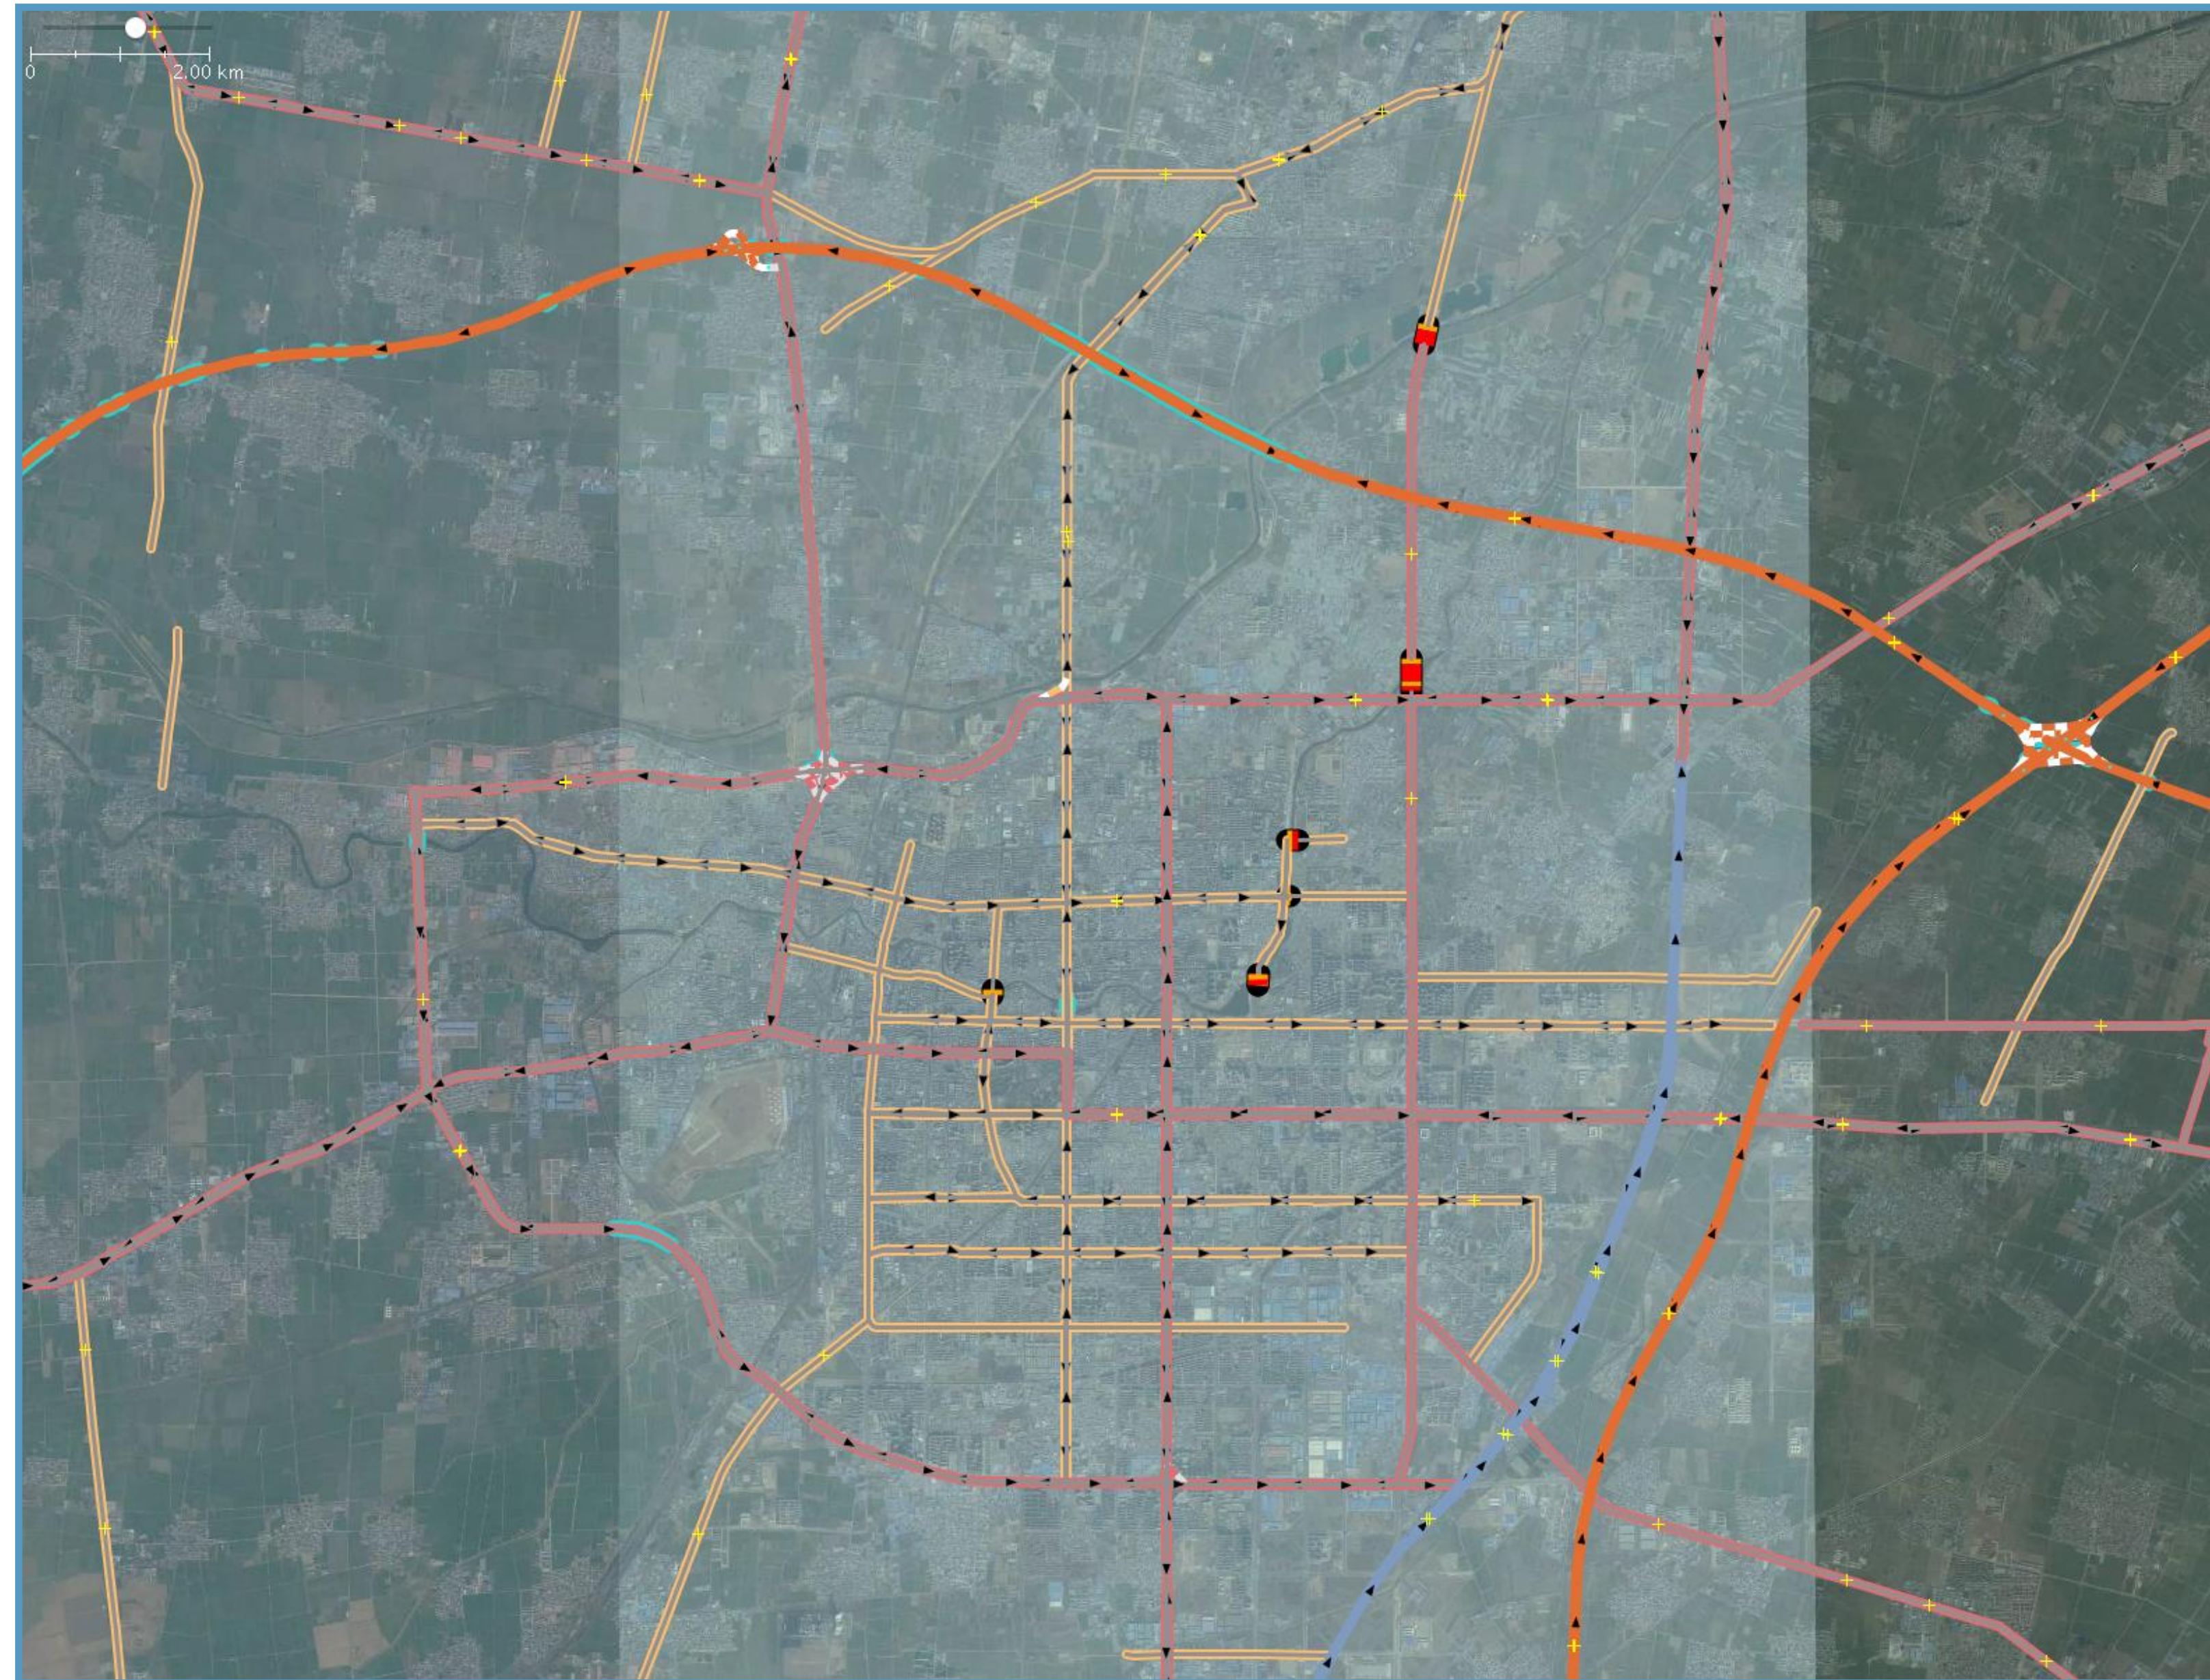

- A few “isolated” secondaries & primaries
- Confirmed missing major highway features
- Overabundance of secondaries

Editing Demo

First Revision

- Based on imagery and OSM wiki, started revising classifications
 - Dropped a bunch of secondaries
 - Added some primaries to cut through the city
 - Added a trunk
- At this point, did not fix any geometry issues except a couple quick problems
- Next step: add or revise geometry

Editing Demo

Final Revision

- Corrected all major geometry issues
- Connected or downgraded “isolated” high classification routes
- Extended primaries into the city center
