Global Coverage

Name	Coverage	Age	Resolution	DOP	URLs (within editors etc)	Notes
Bing Satellite Imagery	global	Varies	Varies		Potlatch2 : Yes (Built-in) JOSM : Yes (Built-in)	You're not allowed to use Bing Maps, only Bing satellite imagery provided in OSM editors.
DigitalGlobe / MapBox	World	ongoing	0.3m - 38m (Z19-Z12)	yes	JOSM : tms[17]:http://{switch:a,b,c}.tiles.mapbox.com/v3/openstreetmap.map-4wvf9l0l/{zoom}/{x}/{y}.png	Included in iD and JOSM. (You can use source=Mapbox for attribution which is not compulsory but good practice.)
DigitalGlobe Premium Imagery	global				JOSM : Yes (Built-in)	
DigitalGlobe Standard Imagery	global				JOSM : Yes (Built-in)	
Imagico.de Imagery	Various places where good imagery is not readily available				JOSM : tms:http://imagico.de/map/osmim_tiles.php?z={zoom}&x={x}&y={-y}	
Esri World Imagery	global	Varies	Varies		JOSM : Yes (Built-in)	

Additional Imagery Sets

- There are various available sets depending on where you are mapping. Country/Regional specific sets can be found here.

- In JOSM there are also sets that can be added and accessed through the preferences menu.

- There are also government provided imagery sets. Eg. LPI NSW Imagery.

- Imagery dates not consistent.
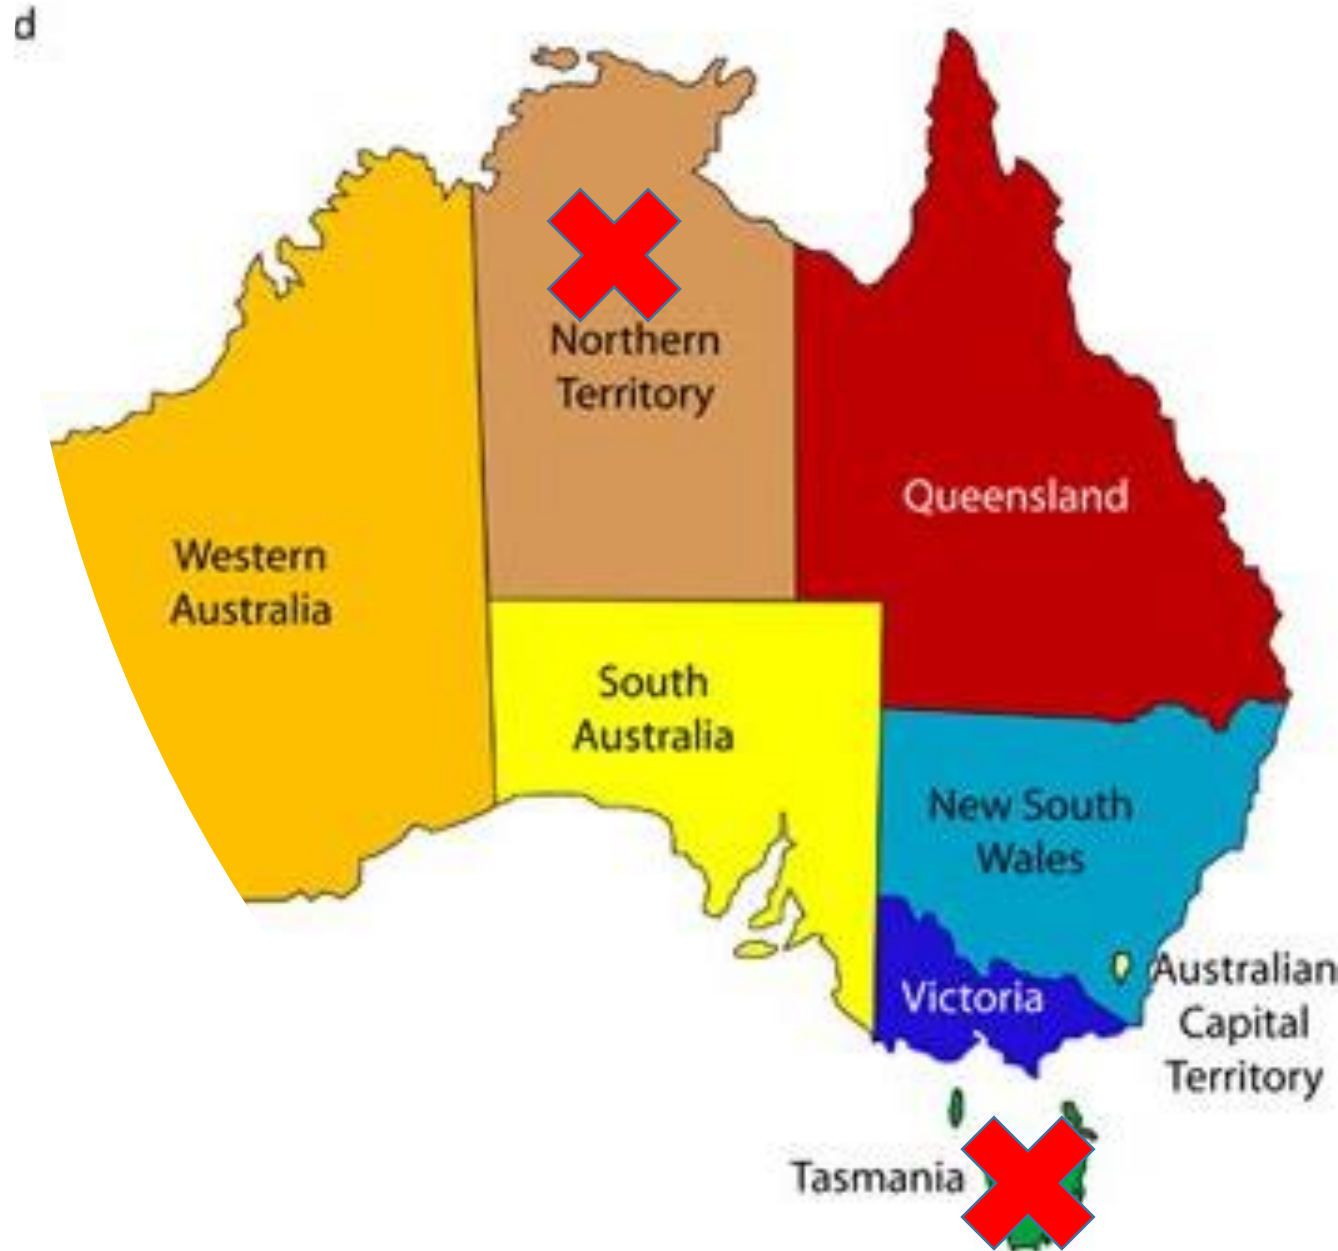

Cloudy? check Imagery Assets

Imagery: Various dates
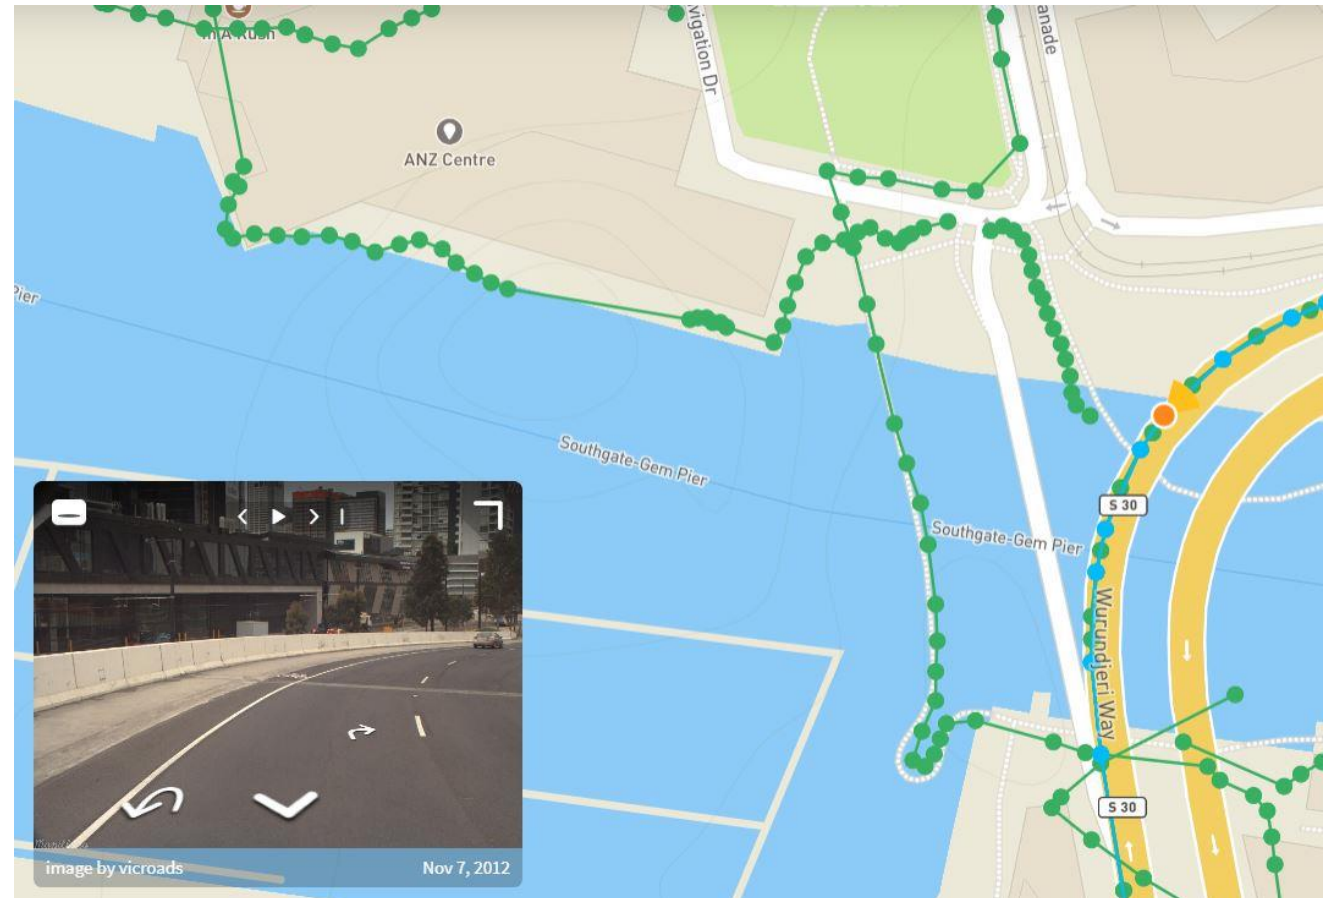

- Not all AI assets contain date into

Government sources:

- There is any number of open source data made available by national, regional, local governments or councils.

- It is important to always understand what legal sources are available for us to use in our projects.

- any number of features or attributes. For example, we could have a dataset of roads which can contain – names, new roads networks, surface type, hierarchy, speed limits, directionality.

Mapillary

- JOSM Mapillary plugin
- Street level imagery
- Sign up!

Verification/Corroboration

- Evidence that supports, or confirms a theory or finding.

- Government resources.

- Alternative map providers. Eg. [Geofarbrik map compare](#)
